Abstract of JP 11028077 (A)

PROBLEM TO BE SOLVED: To obtain the subject acidic drink capable of preventing the generation of aggregates, capable of inhibiting the separation and deterioration of fats and excellent in storage stability by including proteins, fats, a polyglycerol fatty acid ester and a specific sucrose fatty acid ester and controlling the pH of the drink to a specific value. **SOLUTION:** This acidic drink comprises proteins, fats, a polyglycerol fatty acid ester and a sucrose fatty acid ester having a HLB of ≥ 5 , and has a pH of ≤ 5 . The polyglycerol fatty acid ester preferably has a HLB of ≥ 9 . The sucrose fatty acid ester preferably has a HLB of 5-13. The content of the polyglycerol fatty acid ester is preferably 0.001-0.2 wt.%. The content of the sucrose fatty acid ester is preferably 0.001-0.2%.
